GOA PUBLIC SERVICE COMMISSION | COMPUTER BASED RECRUITMENT TEST

Practice Set 6

English (Comprehension), English Grammar, General Knowledge and Current Affairs of India and Goa, Logical Reasoning, and Core. 60 questions, 60 marks, 75 minutes. Answer key and explanations at the end.

What this is. A practice paper in the pattern of the Homoeopathic Physician syllabus (Advt. 06/2026): Comprehension 10, Grammar 5, General Knowledge 10, Logical Reasoning 10 and Core 25. The questions in sections I, II and IV are taken from GPSC CBRT papers of 2023 to 2026, including the medical papers (Medical Officer 2024 and 2025, Pharmacology, Pharmaceutics, Pharmaceutical Chemist, Physiotherapy, Dentist, Ophthalmologist); each explanation names the paper. Section III (GK) is written for a CBRT on 1 November 2026, following the pattern of GPSC's GK papers from 2018 to September 2026: mostly current affairs of August to October 2026, with Goa, important days and some static GK. Where GPSC's printed key was wrong, the corrected answer is given. A few grammar items marked 'GPSC-style practice item' were written to fill the section. The core section is original, set to the ten core topics of the syllabus. In the real paper the core questions come first; here they come last, in syllabus order.

Section	Questions	Marks
English (Comprehension)	1 to 10	10
English Grammar	11 to 15	5
General Knowledge / Current Affairs of India and Goa	16 to 25	10

Each question carries one mark and has five options; option E is always "None of the above", as in the real test. No marks are deducted for a wrong answer. The CBRT for the post of Homoeopathic Physician (Advt. 06 of 2026) is 60 marks in 75 minutes: these four sections plus a 25-mark core section. The qualifying marks are 30 of 60 for General, EWS and ex-servicemen, 27 for OBC, PwD and CFF, and 24 for SC and ST.

SECTION I | 10 MARKS

English (Comprehension)

Passage 1. Read the passage and answer questions 1 to 5.

The unprecedented surge of retail investors entering India’s capital markets, fueled by discount brokerages and mobile investment applications, has democratized a financial terrain once dominated by institutional elites. This digital wave has funneled domestic savings away from traditional low-yield assets like gold and fixed deposits directly into equity markets, providing vital capital to Indian enterprises. However, this rapid financialization introduces severe systemic risks, primarily driven by the behavioral vulnerabilities of inexperienced investors. Many new entrants treat equity markets as speculative spaces, engaging in high-risk options trading and leveraged intraday bets driven by unverified social media influencers. This trend is worsened by a complete lack of financial literacy regarding market cycles, valuation metrics, and risk management practices. A sharp market correction could lead to severe capital losses for millions of middle-class households, damaging long-term faith in the financial system. Securing this retail investment wave requires strong regulations on financial influencers, mandatory risk disclosure tools on trading apps, and deep systemic efforts to turn speculative traders into long-term, informed investors.

1. The entry of retail investors into India's capital markets was mainly accelerated by:

A. Discount brokerages and mobile investment apps.
B. Institutions giving up control of equity.
C. Laws banning individual ownership of gold.
D. Higher interest on fixed deposits.

C. Replacing equities with low-yield assets.
D. Banning individual retail accounts.
E. None of the above

Passage 2. Read the passage and answer questions 6 to 10.

When we begin to study a phenomenon, we do not actually know what we are studying. In order to learn more about it, we formulate a hypothesis. It is important to keep in mind, however, that until we thoroughly test our hypothesis and compare the results of our experiments with its predictions, we are not on solid ground. Of course, where there are gaps in our knowledge, we must have a hypothesis, but we must also test that hypothesis—rigorously and with an uncompromising regard for the truth. Where the hypothesis is inaccurate, we must do more research. The hypothesis of the industrial civilization was that by acquiring and consuming more things we would become more happy, fulfilled, and healthy. Every day, this seems less likely.

6. Which word in the passage means "an untested idea suggested as an explanation for something"?
